

Practice - Combining More Than Two Integers

Combining More Than Two Integers

Steps for combining more than two integers...

- 1) Re-write double signs (if needed)
- 2) Circle and then combine all the positive numbers (by _____).
- 3) Combine all of the negative numbers (by _____)
- 4) Combine the positive total with the negative total (by _____)

Adding **Subtracting**

Example

$$3 + 8 + (-9) =$$

Example:

$$4 + (-10) - (-15)$$

Example

$$12 - (-2) - 5 + (-7) + 9 - 21$$

Additional Practice

1) $-7 + 9 - 3$

2) $6 - (-5) - 11 - 4$

3) $3 - 5 + (-4) - 30 - (-51)$
